

This project involved renovations to the main entrance to Francis Hall on the campus of Alvernia University located in the City of Reading, Berks County, Pennsylvania. The improvements included construction of a 3,000 square-foot building addition, a new walkway system, a plaza/amphitheater facility and new or relocated storm sewer and building rainwater conductor systems. In addition, existing driveways and parking areas were removed or modified.

The project scope contained the following services:

- Site Planning
- Vehicular and Pedestrian Circulation Patterns
- Storm Drainage
- Sediment & Erosion Control Design
- NPDES Permitting
- Landscape Design
- Utility Design & Site Lighting
- Access Management
